1. Introduction

1.1 Project Title

Smart Library Management System

1.2 Project Background

Sri Lankan libraries have long served as gateways to knowledge. However, traditional library management systems, often reliant on manual methods, can slow things down and reduce the space that member involvement can extend positively to the betterment of the reading community. Aiming to change that, our ‘Smart Library Management System’ is a transformative solution designed to empower and enhance the capacity of Sri Lankan libraries, creating a more enhanced reading experience. It's not just about automating tasks like cataloging books or managing memberships; it's about bringing the community together in new ways. With features like “Ask from Community” and “Idea Corner”, readers can connect, and even request to add new additions to the library collection.

By making operations smoother and encouraging more engagement, our system helps libraries work better for everyone. It enriches the experience for members and contributes positively to the reading culture. By introducing this system to libraries across the country, it also has the potential to open doors to a world of knowledge, creativity, and growth for all Sri Lankans.

1.3 Project aims / objectives

1. To revolutionize the Sri Lankan libraries by implementing a comprehensive Library Management System, aimed at enhancing community engagement and library operations, and opening a space for a culture of continuous learning and growth.
 - a. Enhance Community Engagement and Promotion of Reading Culture
 - i. Enable readers to connect and collaborate through features like "Ask from Community" and "Idea Corner".
 - ii. Develop a sense of connection among library members through their feedback and additions for the library.

iii. Provide access to a wide range of resources including e-books, e-newspapers, and past papers, thereby promoting continuous learning.

b. Streamline Operations

i. Automate tasks such as book management, member registration, and inventory tracking to optimize efficiency.

ii. Implement a user-friendly interface for seamless navigation and accessibility, catering to both staff and users.

c. Effective Task Management

i. Equip staff members with tools for effective task management, and communication through the E-Task Panel.

ii. Establish clear roles and responsibilities for different staff tiers, facilitating smooth coordination and collaboration within the system.

2. Project Description

2.1 Functional Requirements

Sub Components

- Book Management
- Member Management
- Inventory Management
- Finance Management
- E-task panel
- Donation Handling
- Idea Corner
- Ask from Community
- E-Resource section

Book Management

- Ability to add, delete, modify, view, and search books
- Ability to restore the deleted books within 14 days of deletion
- Auto-generate the Book ID according to the book category
- Generate barcode according to the Book ID
- Ability to give several levels of access according to user type
- Ability to check in and check out books

Member Management

- Ability to add, modify, view, and search members
- Auto-generate the Member ID during their registration
- Generate barcode according to the Member ID
- Ability to give several levels of access according to user type

Login Registration

- The system must provide a function to register on the system
- The user can register by using a valid email and password
- The user can choose account type (user/staff member)
- The text field must be validated at registering
- When logging into the system username and password must be matched with the database
- The person who logs in must be redirected to their particular panel (System Administrator, Librarian, Library Assistant Registrar, Library Information Assistant, Registered Library Users)
- The users who do not have correct login credentials cannot be logged into the system

Inventory Management

- Ability to add, delete, modify, view, search in inventory
- Auto-generate the Inventory ID while updating the inventory
- Generate barcode according to the Inventory ID
- Ability to give several levels of access according to user type

Finance Management

- Ability to generate report
- Ability to give several levels of access according to user type

E-Task Panel

- Ability to add, delete, modify, view tasks
- Ability to assign tasks to the lower-level members of the member hierarchy
- Ability to show notifications
- Ability to give several levels of access according to user type

Donation Handling

- Ability to manage books and funds as donations
- Ability to give several levels of access according to user type

Ask from Community

- Ability to send, view, modify, delete posts, and search according to their interested category
- Ability to share insights in response to posts
- Ability to give several levels of access according to user type

E-Resources Section

- Ability to add, buy, view, delete, and search e-resources
- This includes E-newspapers and past papers
- Ability to give several levels of access according to user type

2.2 Non-functional Requirements

1. Usability -
 - The website should be user-friendly and attractive to the user with an easy-to-use interface
 - The website response time should be minimal
2. Scalability -
 - The site should be expandable
3. Maintainability -
 - The site should be maintainable
4. Data Privacy -
 - Personal data must not be exposed to unauthorized parties

2.3 User Levels

1. Library users
 - a. Registered Users
 - b. Guest Users
2. Staff members
 - a. System Administrator
 - b. Librarian
 - c. Library Assistant Registrar
 - d. Library Information Assistants

2.4 User Roles

Users are arranged in a hierarchical order, with each user above possessing the functionalities of those below.

Staff Members

1. System Administrator
 - a. Can Access all the functions of the Library Management System
 - b. This role can also be done by the Librarian
2. Librarian
 - a. Updates related to Finance Management by the Library Assistant Registrar, and updates related to Donation Handling by the Library Information Assistants
 - b. Approving Library Assistant Registrar accounts, and Library Information Assistant accounts.
 - c. Access Member Management Unit
 - d. Assign tasks to others by using the E-Task panel
3. Library Assistant Registrar
 - a. Access Inventory Management
 - b. Access Finance Management
 - c. Access Member Management
 - d. Assign tasks to others by using the E-Task panel except for the Librarian

4. Library Information Assistants

- a. Access Books Check-In and Check-Out Unit
- b. Access Book Management
- c. Access Member Management
- d. Upload e-resources
- e. Approve “Idea Corner” requests
- f. Get fines
- g. Access Donation Handling Unit
- h. Can use the E-Task Panel except for the option for Assigning Tasks

Library Users

5. Registered Users

- a. View Books
- b. Make a check-out book request to the officers
 - The request is only valid for 20 mins and a code is sent to the user's email once a request is made.
 - A single user can make only 3 requests per day
 - Registered Library Users are verified when they first attend the library in person, and books can only be borrowed by verified Registered Library Users.
- c. Pay fines
- d. Can access free e-newspapers and past papers
- e. Can access “Ask from Community”
- f. Make requests to add creations to “Idea Corner”
- g. Can use the E-Task panel (only for notifications)

6. Guest Users

- a. Ability to view books
- b. Ability to see the location and book list
- c. Ability to see the book availability

2.5 Diagrams

Use case Diagram

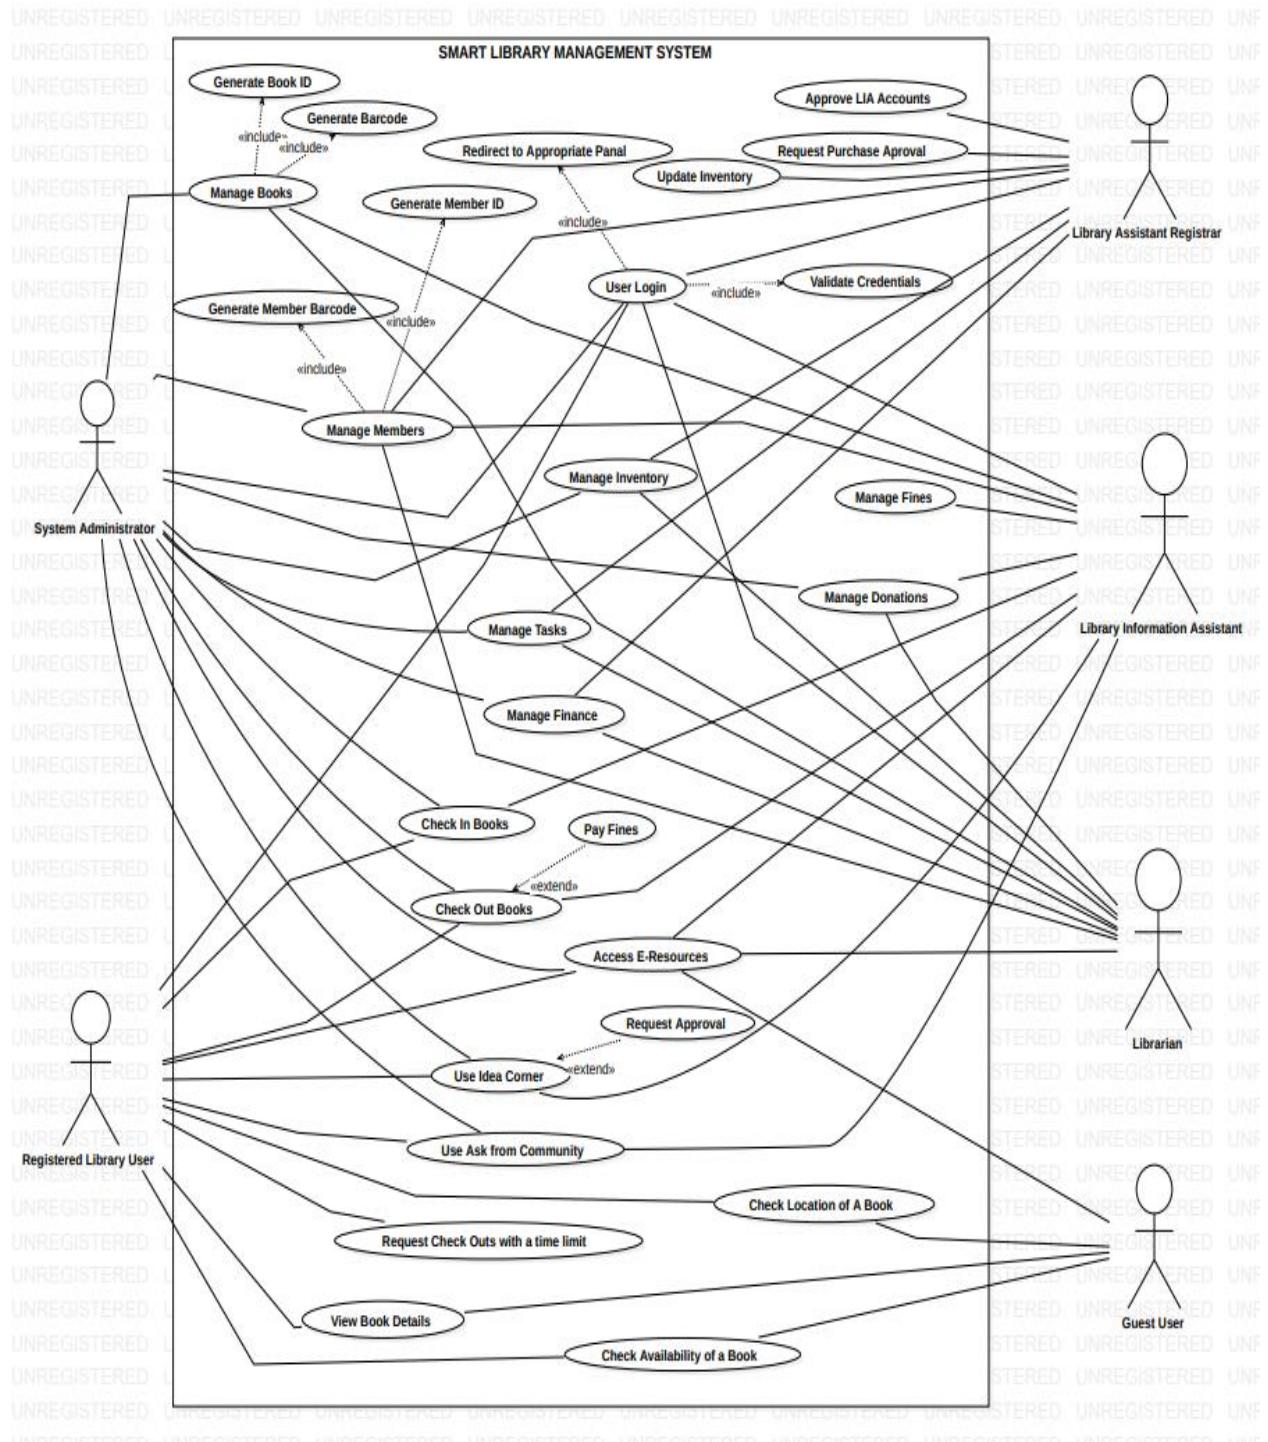

Figure 01 Use Case diagram

Class Diagram

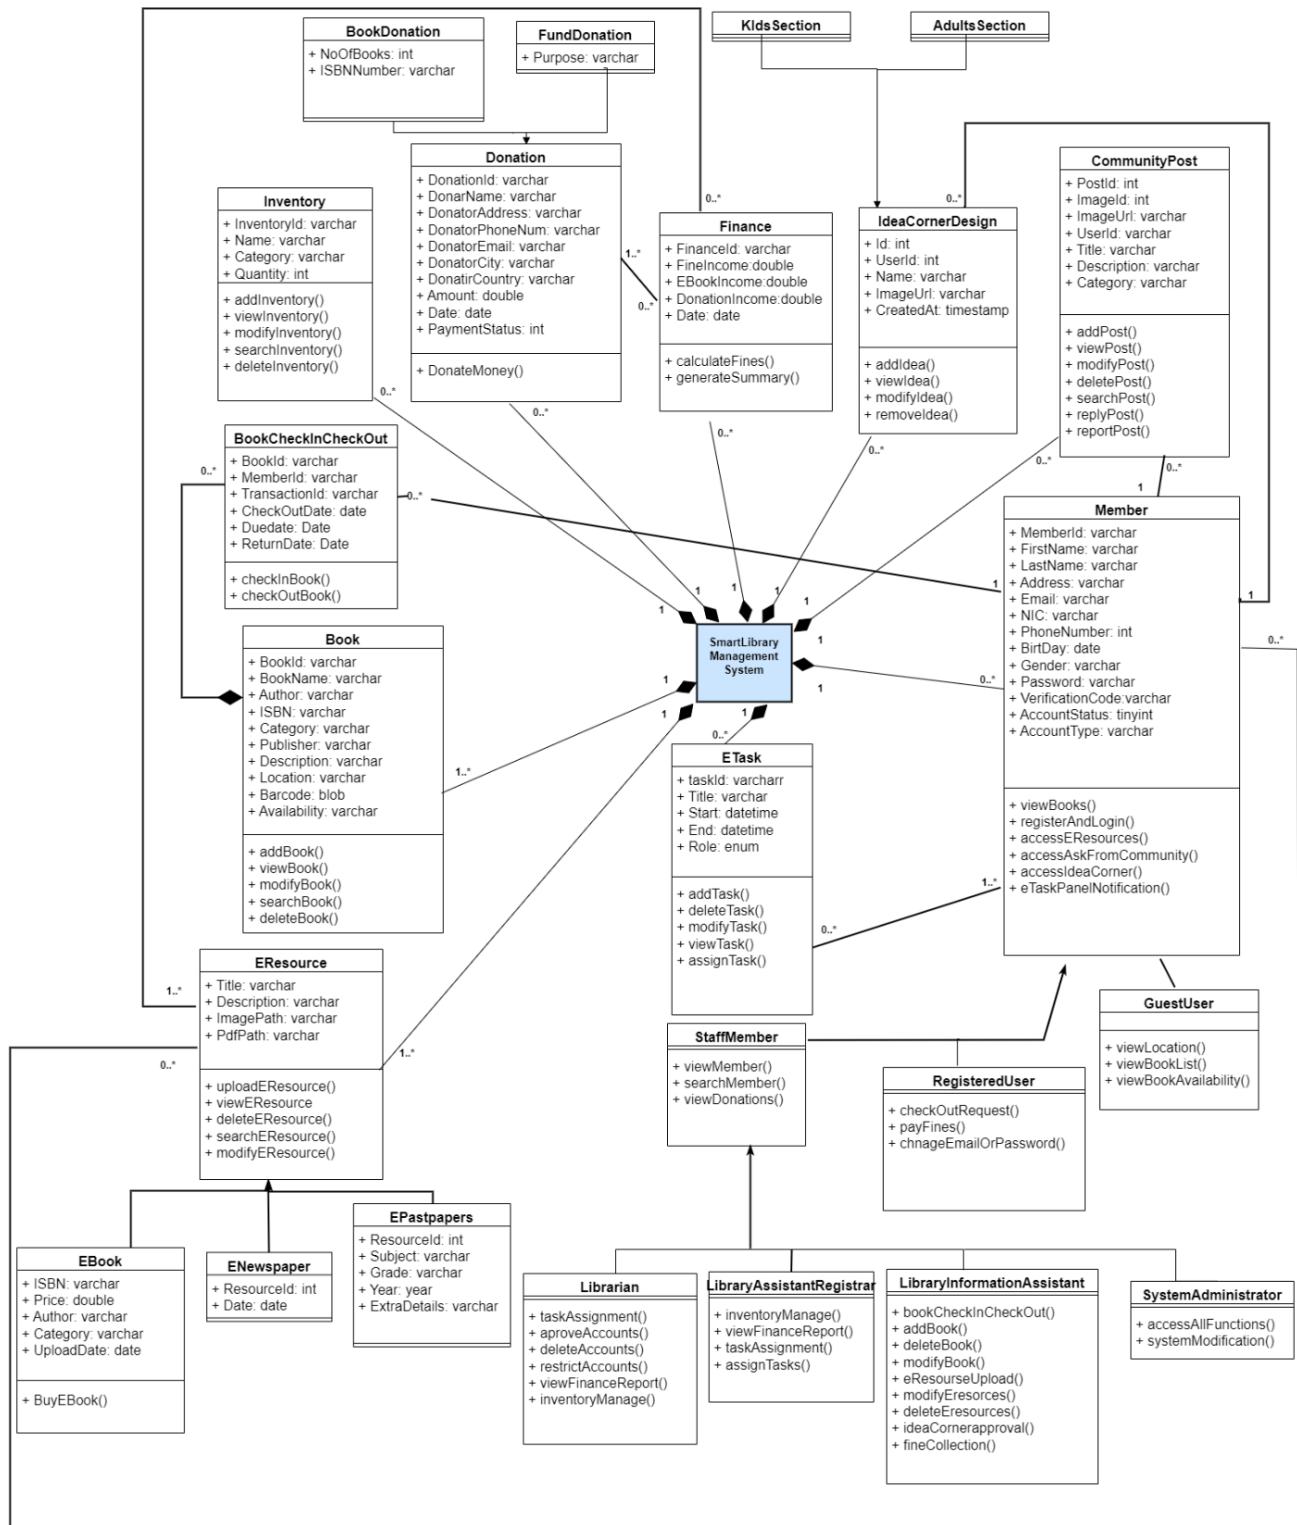

Figure 02 Class diagram

ER Diagram

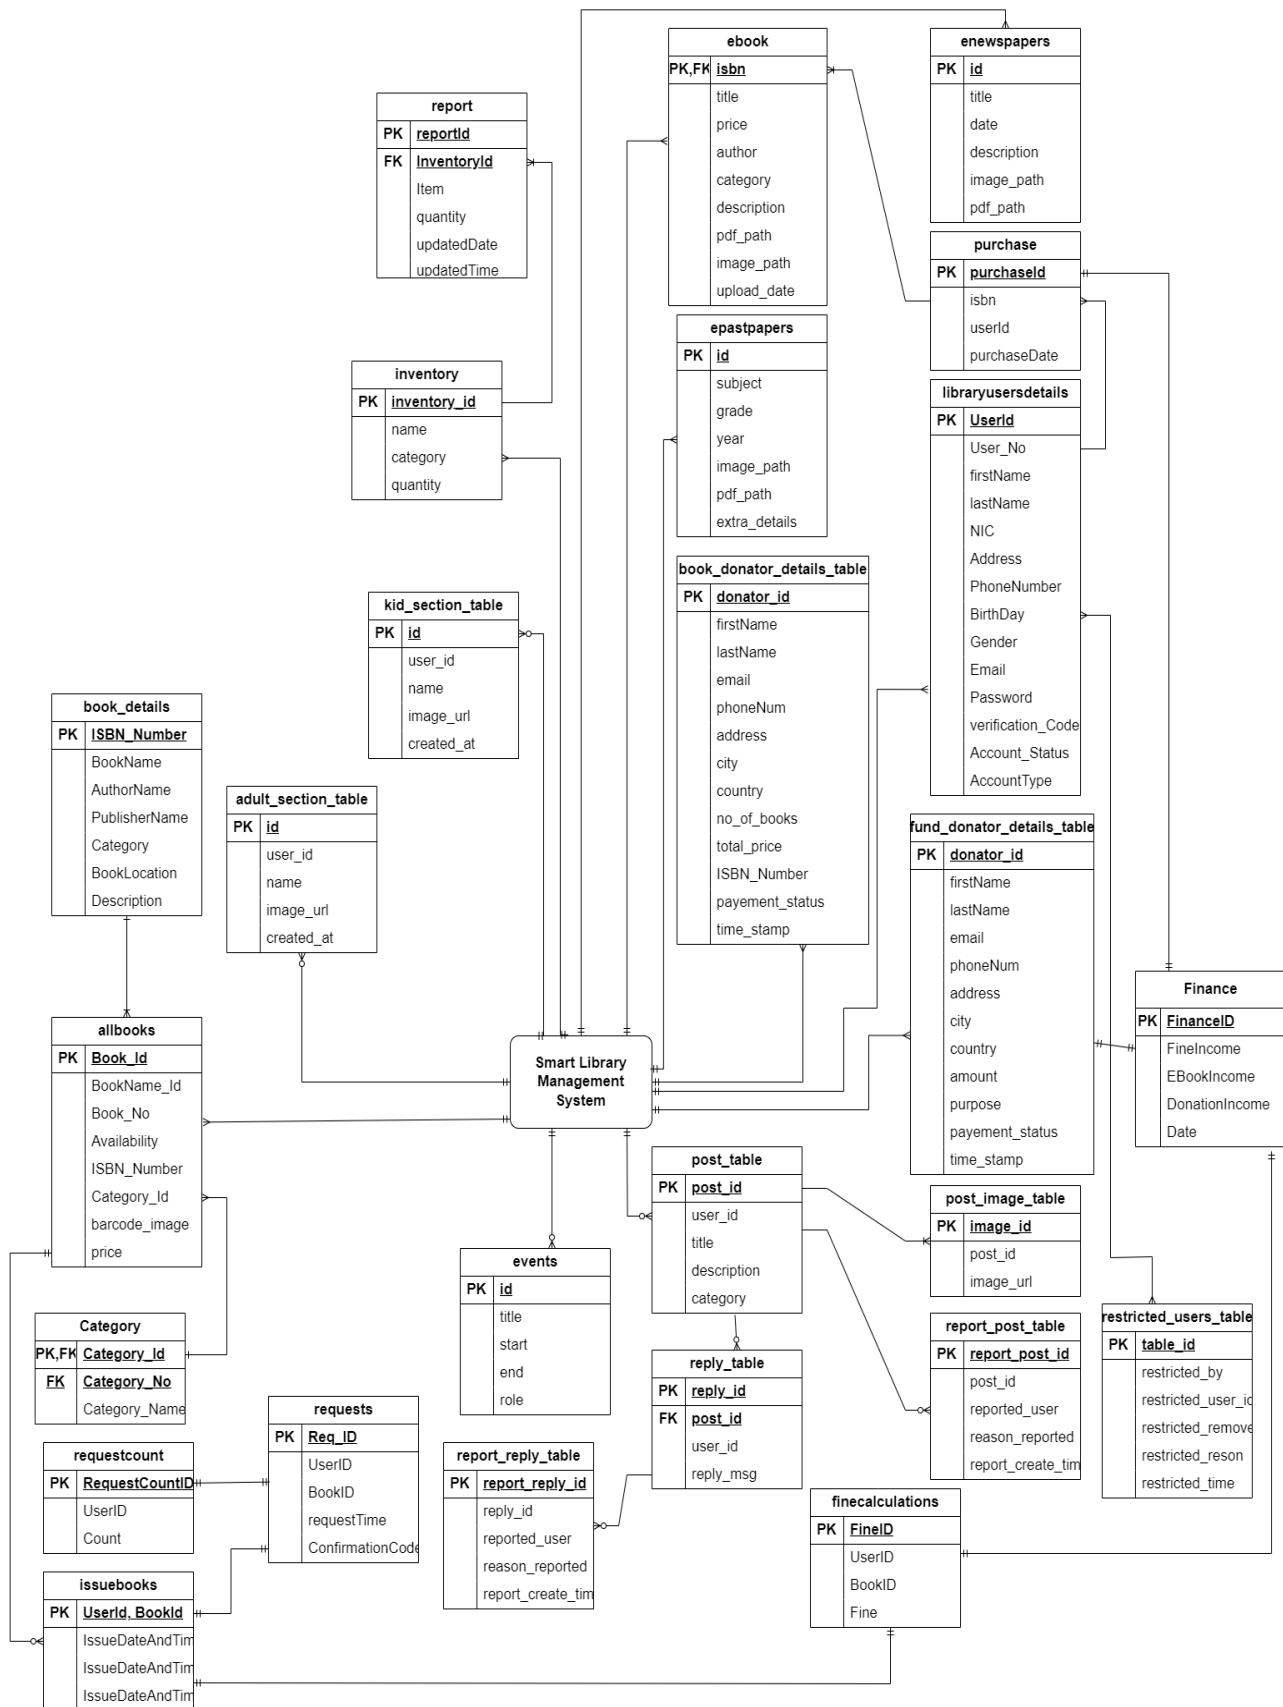

Figure 03 ER diagram

3. Methodology

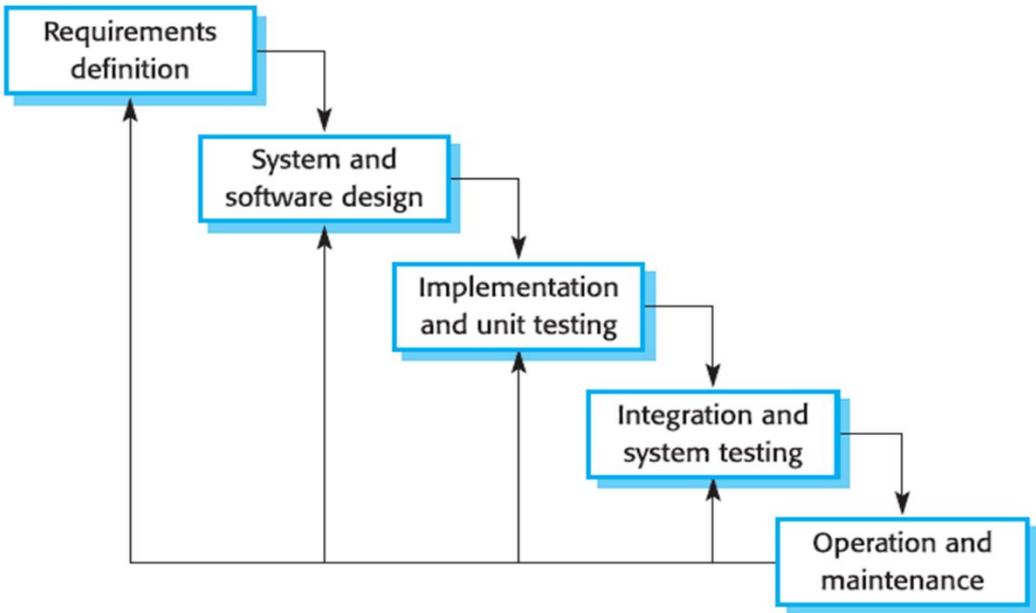

3.1 Waterfall Methodology

Waterfall methodology is a widely used software development methodology with a linear approach. In Waterfall, each workflow stage needs to be completed before moving on to the next step. While there are various types of other methodologies, Waterfall is well suited for projects where the objectives are clearly outlined from the beginning.

Our Smart Library Management System is ideally suited for the Waterfall development methodology. Unlike projects with constantly evolving requirements, the Smart Library Management System benefits from a clearly defined set of functionalities from the outset. Waterfall's strength lies in its structured, phase-by-phase approach. This allows us to meticulously gather requirements, translate them into a detailed design, and then build upon a solid foundation. Furthermore, Waterfall's emphasis on comprehensive documentation ensures clear communication throughout the development lifecycle as well as between developers, librarians, and other stakeholders. This is critical for the 'Smart Library Management System', where various functionalities such as book management, member portals, and community engagement privileges such as "Ask from Community" and "Idea Corner" need to work seamlessly together.

"This takes the fundamental process activities of specification, development, validation, and evolution and represents them as separate process phases such as requirements specification, software design, implementation, testing, and so on." (Sommerville, 2011, page 29)

"The waterfall model is an example of a plan-driven process - in principle, you must plan and schedule all of the process activities before starting work on them." (Sommerville, 2011, page 30)

3.2 How we are planning to carry out our development phases

Requirement Definition

The first step is understanding the needs of our users. We'll conduct interviews with librarians and members, utilizing both closed-ended questions for specific information and open-ended ones to gather broader insights. This will help us map out the functionalities the system should possess and ensure it caters to the needs of both librarians and library members.

System and Software Design

Once we have a clear understanding of the requirements, we'll move on to the design phase. Here, we'll create visual representations of the system's functionality using tools like use case diagrams, activity diagrams, and class diagrams. These diagrams will map out the system's logical structure and database design, ensuring a well-organized and efficient system. Finally, we'll design a functional interface using HTML. Throughout this process, we'll involve the client for feedback to ensure the design aligns with their vision.

Implementation and Unit Testing

With a finalized design, we'll move on to development. The system will be built using HTML, CSS, and JavaScript for the front end, with libraries like CSS libraries, and React JS to enhance functionality. For the back end, we'll utilize PHP to handle server-side tasks and data management. The library's data will be stored in a MySQL database running on a local XAMPP server. During this phase, all the individual components, like functions or classes, are also tested in isolation to ensure they function correctly according to their specifications.

Integration and System Testing

In this phase, all the independently developed components are integrated into a single, functional system, ensuring that the entire system functions as designed and meets all requirements outlined in the specifications. This phase is crucial for identifying and resolving any bugs or inconsistencies. If there are some bugs, they will be fixed before going to the next phase.

Operation and Maintenance

Upon successful completion of testing, the Library Management System will be deployed to the designed environment (servers). The system is installed and configured on the servers where it will be operational, and the system will be handed to the client. Maintenance will also be ensured as an ongoing process to address any bugs or issues that may arise after deployment.

4. Resources

4.1 Software requirements

- Visual Studio Code Editor**

Visual Studio Code, also commonly referred to as VS Code, is a source-code editor developed by Microsoft for Windows, Linux, macOS, and web browsers. Features include support for debugging, syntax highlighting, intelligent code completion, snippets, code refactoring, and embedded version control with Git. This is used to code HTML, CSS, JavaScript, and PHP.

- XAMPP Server**

XAMPP is a free and open-source cross-platform web server solution that consists of the Apache HTTP Server, MariaDB database, and interpreters for scripts written in the PHP and Perl programming languages. This is used as a local host server to test the website before introducing it to the main server.

- Canva**

Canva is an online tool used for logo designing, image editing, and creating images on the website.

- MySQL**

MySQL is a relational database management system that is based on structured query language (SQL).

- Google Docs**

Google Docs is a free, web-based online word processor that is used to create and format documents and work with other people.

- Web browser**

Any kind of updated Web browser such as Google Chrome or Microsoft Edge is needed to achieve the completed output and testing.

4.2 Hardware requirements

- Router with an Internet connection
- Laptop / Desktop computer with the following requirements
 - Hard Disk - 10 GB or higher
 - RAM - 8 GB or higher
 - Operating System - Windows 10/11, MacOS
 - Processor - I5 or higher
- Storage Device to store backups, project files, and other related data

4.3 Technology

- HTML5
- CSS 3
- JavaScript
- React Js
- CSS Libraries
- PHP 8.2
- MySQL 8.0
- APIs

5. Implementation

5.1 Progress of the project

- Identifying the topic and gathering requirements is 100% complete.
- Requirements analysis and specification are 100% complete.
- User interfaces, databases, and software design are 100% complete.
- The front end of the system is 100% complete.
- The backend completion percentages are as follows:
 - ✓ Book Management Unit: 85% complete
 - ✓ Member Management Unit: 80% complete
 - ✓ Inventory Management Unit: 85% complete
 - ✓ E-task Panel: 75% complete
 - ✓ Donation Handling: 80% complete
 - ✓ Idea Corner: 75% complete
 - ✓ Ask from Community: 85% complete
 - ✓ E-Resource Section: 85% complete

6. Project Plan

6.1 Gantt Chart

Task	Week											
	1	2	3	4	5	6	7	8	9	10	11	12
Identify topic, gathering requirements												
Requirements Analysis & specification												
User Interfaces, Database, and Software design												
Implementation and Unit Testing												
Integration and System Testing												
Operation and Maintenance												
Documentation												

6.2 Individual Contribution

Registration Number	Name	Contribution
UWU/CST/21/034	R.K.C. Priyadarshana	Donation Handling and Ask from Community frontend and backend, Dashboard frontend
UWU/CST/21/044	P.S.H. Gunasekara	Book Management and User Login frontend and backend, Homepage frontend
UWU/CST/21/030	H.A.I. Kaushalya	Member Management frontend and backend
UWU/CST/21/047	A.M.T.S. Adikari	E-task Panel and Idea Corner frontend and backend
UWU/CST/21/060	C.C.R. Jayawardana	Inventory Management and Finance Management frontend and backend
UWU/CST/21/038	I.C. Dewamiththa	E-Resources Section and Book check in check out unit frontend and backend

6.3 Future Work

Complete the backend of the following units:

- Book Management Unit
- Member Management Unit
- Inventory Management Unit
- Finance Management Unit
- E-Task Panel
- Donation Handling
- Books Check-in and Check-out Unit
- Idea Corner
- Ask from Community
- E-Resource Section

Conduct Integration and System Testing

Deploy the system to servers

Appendix

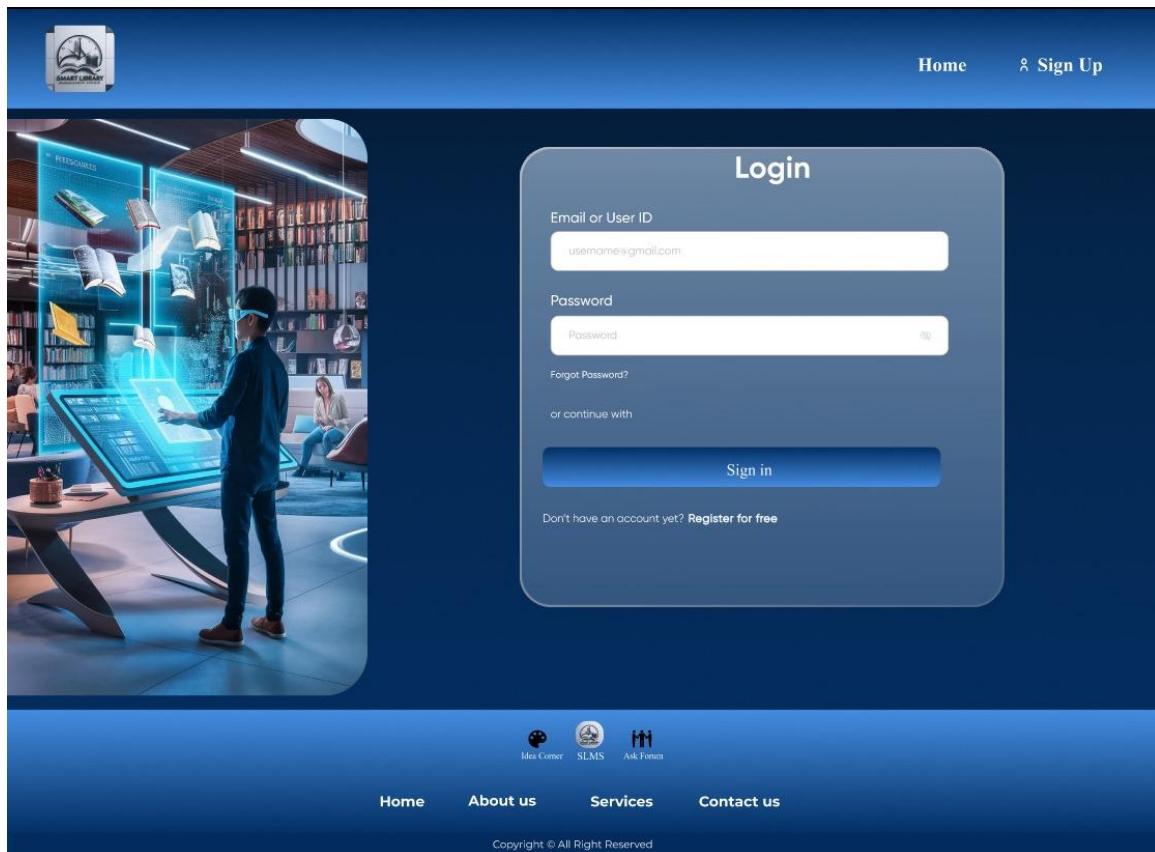

User Interfaces

Home

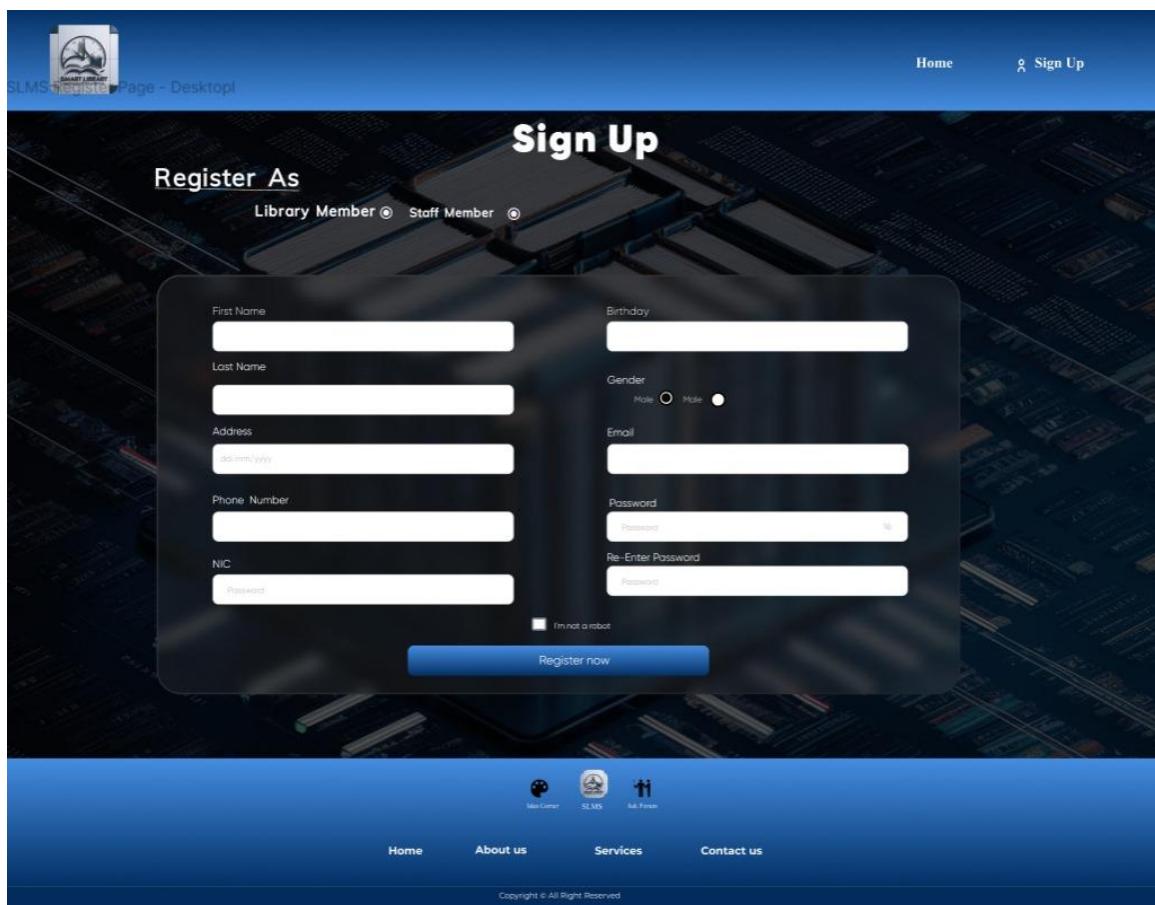

The screenshot displays the homepage of the Smart Library Management System. At the top, there's a navigation bar with links for Home, About Us, Services, Contact Us, Ask Forum, Idea Corner, and Sign In. A welcome message "Welcome sajan!" is shown. The main header features the text "Books at Your Fingertips" with a subtext: "Streamline your reading experience with our intuitive library management system, making it easier to discover, borrow, and enjoy your favorite titles." Below this is a "Sign Up" button and an image of a laptop displaying a library interface. The page is divided into several sections: "About Us" with a brief description and three small images; "Services" with a large image of a hand interacting with a futuristic touch screen monitor displaying library icons, and a list of services including Book Management, Member Management, Inventory Management, Finance Management, E-task panel, Donation Handling, Idea corner, Ask from Community, and E-Resource section; and a "Contact us" section with a form for entering first name, last name, email address, and message, followed by a "Submit" button and a "CONTACT US" button overlaid on an image of a library aisle.

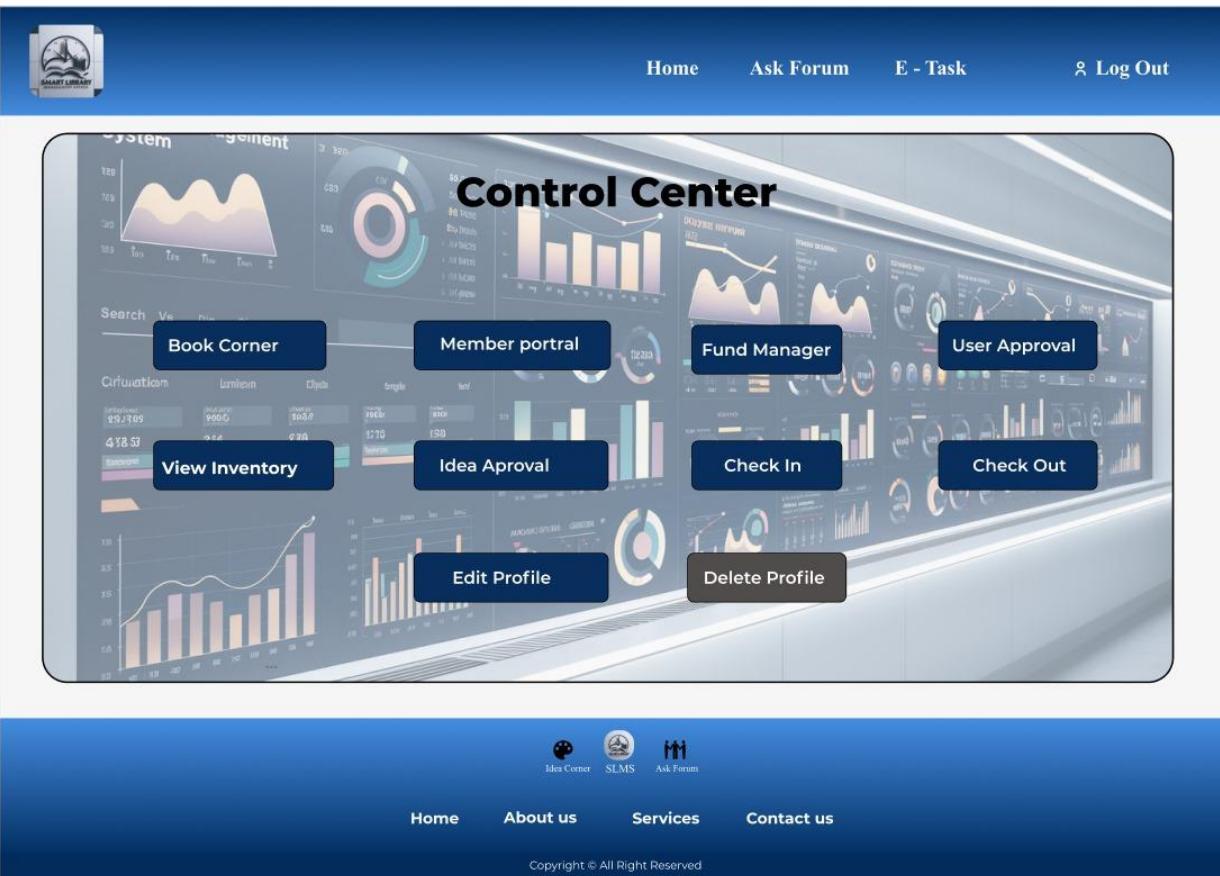

Login

Sign Up

Dashboard

The image shows a comprehensive dashboard titled "Control Center" for a "Smart Library". The dashboard is divided into several sections:

- Top Left:** A line chart titled "System Segment" showing data over time.
- Top Right:** A donut chart showing various library metrics.
- Center Top:** A large title "Control Center" in bold black letters.
- Left Side:** A sidebar with a search bar and navigation links for "Circulation", "Inventory", and "Books". It also displays statistics like "Total Books: 239,789" and "Available Books: 418,53".
- Bottom Left:** A bar chart showing book categories.
- Bottom Right:** A line chart showing book circulation over time.
- Central Area:** A grid of ten blue rectangular buttons with white text, each representing a different function:
 - Book Corner
 - Member portal
 - Fund Manager
 - User Approval
 - View Inventory
 - Idea Approval
 - Check In
 - Check Out
 - Edit Profile
 - Delete Profile

At the bottom of the dashboard, there are links for "Idea Corner", "SLMS", and "Ask Forum".

The footer of the page includes a navigation menu with "Home", "About us", "Services", and "Contact us", along with a copyright notice: "Copyright © All Right Reserved".

The screenshot shows the 'Restore Books Relevant To ISBN' interface. At the top, there are 'Home' and 'Log Out' links. Below that is a search form with fields for 'ISBN No' (9789555640121), 'Book Name' (Madol Doova), and 'Category' (a dropdown menu showing 'select category...'). A large button labeled 'Display Deleted Books' is centered. Below it is a table listing four deleted books:

No	Book ID	Restore
01	COM/I/1	<button>Restore This</button>
02	COM/I/2	<button>Restore This</button>
03	COM/I/3	<button>Restore This</button>
04	COM/I/4	<button>Restore This</button>

A blue 'Restore All' button is located at the bottom left of the table. The footer contains links for 'Idea Center', 'SLMS', and 'Ask Forum', along with 'Home', 'About us', 'Services', and 'Contact us'.

The screenshot shows the 'Book Check-In' interface. At the top, there are 'Home' and 'Log Out' links. Below that is a form for 'Book Details' with fields for 'Book ID' (COM/I/1), 'Category' (a dropdown menu showing 'select category...'), 'Book Name' (Martin Wickramasinghe), and 'Current Availability' (Available). Below that is a form for 'User Details' with fields for 'User ID' (COM/I/1) and 'User Name' (Martin Wickramasinghe). A red message 'Calculated Fine : RS 00.00' is displayed. A checkbox is present below the user details. A large blue 'Check-In' button is at the bottom right. The footer contains links for 'Idea Center', 'SLMS', and 'Ask Forum', along with 'Home', 'About us', 'Services', and 'Contact us'.

Finance Management

The screenshot shows the 'Finance Mangement' section of a library management system. At the top, there is a logo for 'SMART LIBRARY' and a navigation bar with icons for Home, Log Out, and a search bar labeled 'Generate Summary Report'. Below the search bar are date selection fields for 'From' and 'To'. A table displays financial data with columns for Finance ID, Fine Income, E- Resource Income, Donation Income, and Date. The footer contains links for Idea Corner, SLMS, Ask Forum, and navigation links for Home, About us, Services, and Contact us. Copyright information is also present.

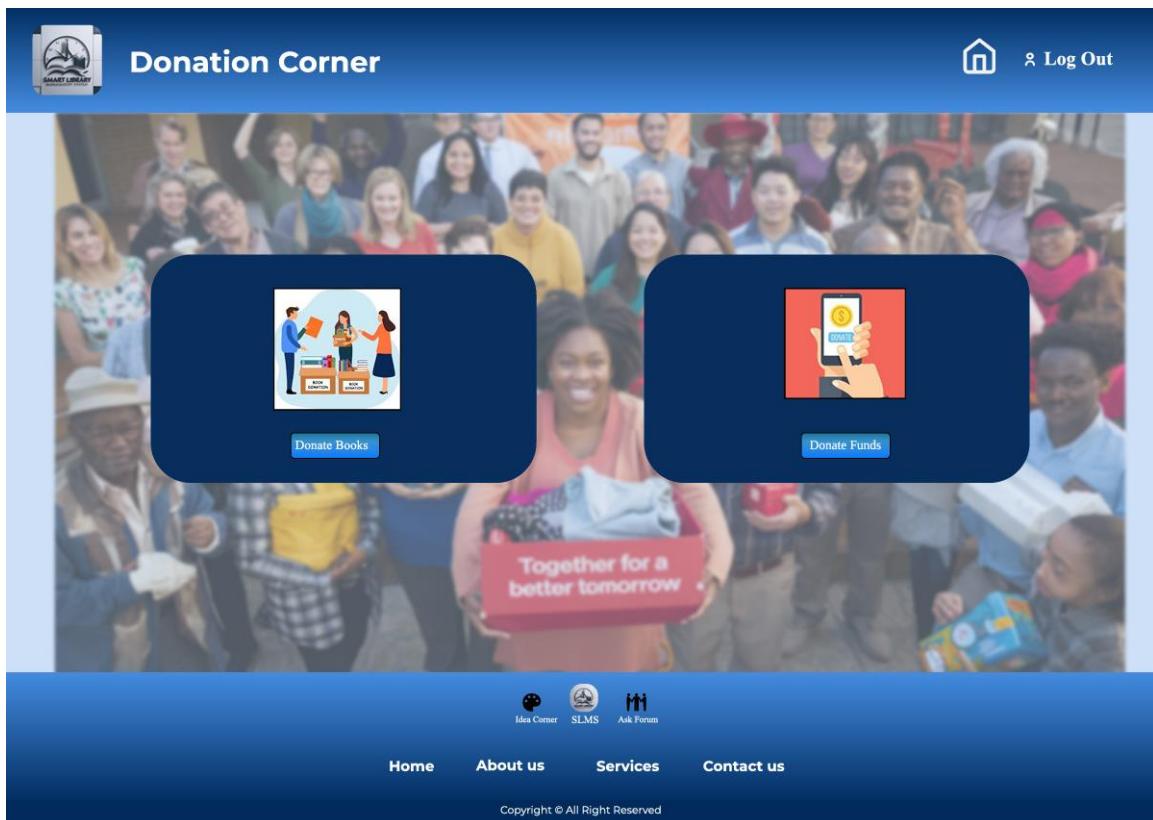

Finance ID	Fine Income	E- Resource Income	Donation Income	Date
U005	1100	1000	1500	2024-06-09
U004	900	800	1000	2024-06-08

U002	600	500	400	2024-06-08
U001	400	200	100	2024-06-05

E Task Panel

The screenshot shows the homepage of the E-TASK PANEL. At the top, there is a logo for "SMART LIBRARY" and a navigation bar with links for "Home", "Ask Forum", "Idea Corner", and "Log Out". Below the navigation bar is a calendar for June 2024. The calendar has a header row with buttons for "Today", "Back", "Next", "Month", "Week", "Day", and "Agenda". The days of the week are labeled "Sun", "Mon", "Tue", "Wed", "Thu", "Fri", and "Sat". The dates from 26 to 30 are in a light gray background, while the dates from 01 to 06 are in a light blue background. At the bottom of the page, there are links for "Home", "About us", "Services", and "Contact us", along with icons for "Idea Corner", "SLMS", and "Ask Forum". A copyright notice "Copyright © All Right Reserved" is at the very bottom.

This screenshot shows the E-TASK PANEL interface with a "New Task" modal dialog box overlaid. The modal has a title "New Task" and an "X" button to close it. It contains four input fields: "Task Name" (with placeholder "Enter Task Name"), "Start Time (HH:MM AM/PM format)" (with placeholder "Enter Start Time"), "Duration (hours)" (with placeholder "Enter Duration"), and "Select Role" (a dropdown menu currently set to "All"). In the background, the main calendar for June 2024 is visible, showing the same color coding for dates as the homepage. The footer links and icons are also present.

Donation Handling

The screenshot shows the 'Donation Corner' section of the Smart Library website. At the top, there's a logo for 'SMART LIBRARY' and a 'Log Out' button. Below the header is a large, diverse crowd photograph with a red banner in the foreground that reads 'Together for a better tomorrow'. Two prominent dark blue rounded rectangular buttons are overlaid on the image: one on the left labeled 'Donate Books' with an icon of two people at a counter, and one on the right labeled 'Donate Funds' with an icon of a hand holding a smartphone displaying a coin.

The screenshot shows the 'Book Donations' section of the Smart Library website. The top navigation bar includes the 'Smart Library' logo, a 'Log Out' button, and a navigation menu with icons for 'Idea Corner', 'SLMS', and 'Ask Forum'. Below the menu, there are eight cards, each representing a copy of the book 'The Nightingale' by Donna Tartt. Each card displays the book's title, ISBN (9780062315007), author (Donna Tartt), publisher (Back Bay Books), and unit price (Rs. 1500.99/-). A 'Donate now' button is located at the bottom of each card. Navigation arrows at the bottom center allow users to flip through the cards. The footer contains links to 'Home', 'About us', 'Services', 'Contact us', and a copyright notice: 'Copyright © All Right Reserved'.

Ask from Community

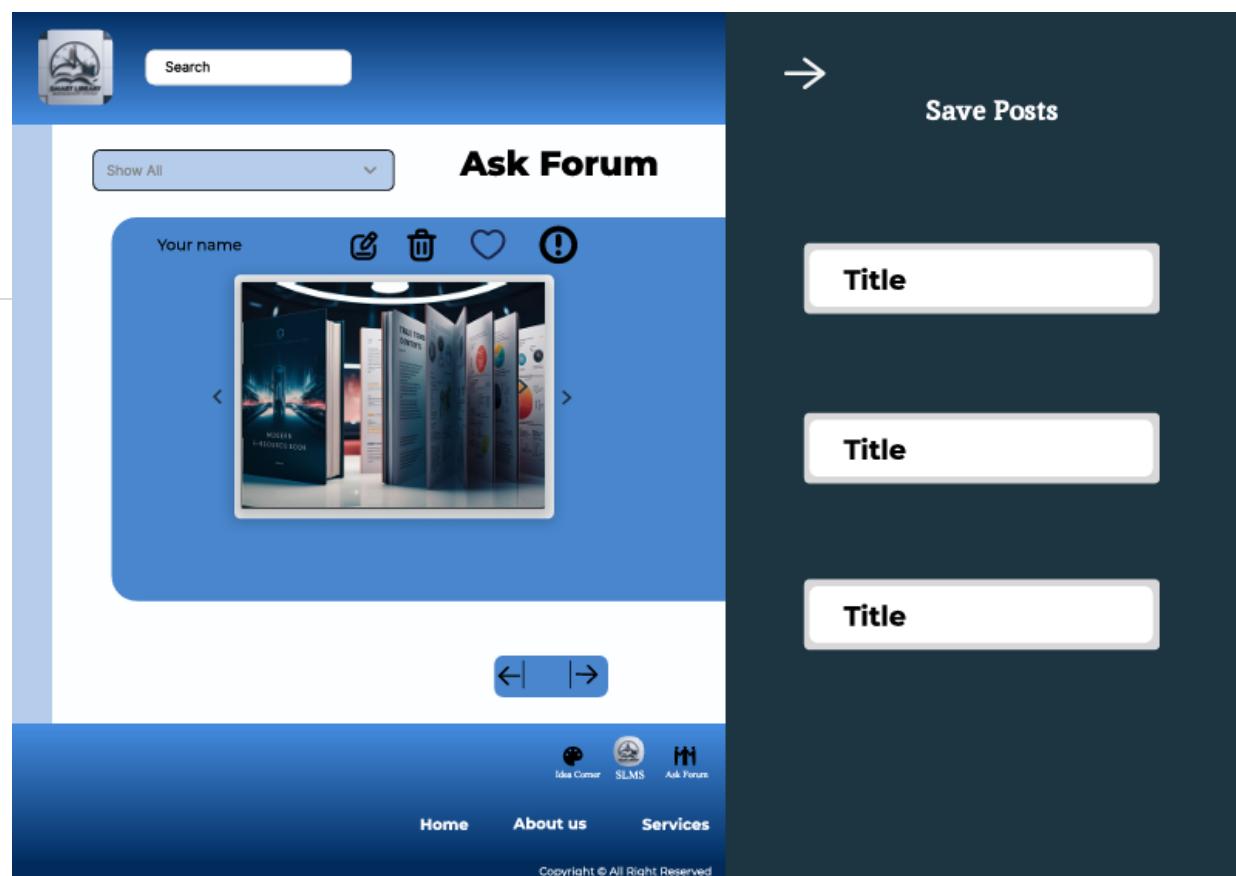

The screenshot shows the 'Ask Forum' section of the Smart Library website. At the top, there's a search bar and a navigation bar with icons for Home, Refresh, Chat, and Log Out. Below the header, a dropdown menu says 'Show All'. The main title 'Ask Forum' is centered above a form area. The form includes fields for 'Your name' (with a placeholder 'Smart Library'), 'Title' (placeholder 'description here about your Problem'), and a text area for 'Description' with a placeholder 'enter your reply'. Buttons for 'Send Reply' and 'Show Replies' are at the bottom of the form. To the left of the form is a preview area showing a stack of books with the title 'MODERN E-RESOURCE BOOK'. Below the preview are edit, delete, like, and warning icons. Navigation arrows (left, right) are at the bottom of the preview area. A large blue button with a white plus sign is on the right side of the form. The footer contains links for Idea Center, SLMS, and Ask Forum, along with Home, About us, Services, and Contact us buttons. Copyright information 'Copyright © All Right Reserved' is at the bottom.

This screenshot shows the 'Ask Forum' section with a sidebar on the right labeled 'My Posts'. The sidebar has three empty 'Title' input fields. The main content area is identical to the first screenshot, featuring the 'Ask Forum' title, a form for posting, and a preview of the 'MODERN E-RESOURCE BOOK'. The footer is also the same, with links for Idea Center, SLMS, and Ask Forum, and copyright information.

The screenshot shows the 'Ask Forum' section of the Smart Library website. At the top, there's a search bar and a navigation bar with icons for home, refresh, heart, message, and logout. Below the header, a dropdown menu says 'Show All'. The main title 'Ask Forum' is centered above a form. The form includes fields for 'Your name' (with edit, delete, heart, and warning icons), a preview image of a modern e-book, and a large text area for 'Title' and 'description here about your Problem'. Below the text area is a search bar ('enter your reply') and two buttons: 'Send Reply' and 'Show Replies'. To the right of the main form is a sidebar with user messages and a reply message. Navigation arrows and a plus sign are at the bottom.

This screenshot shows the 'Ask Forum' section with a 'Save Posts' feature overlay. The main interface is identical to the first one, featuring the 'Ask Forum' title, a form for posting a question, and a sidebar for messages. On the right side, a dark overlay titled 'Save Posts' contains three empty text input fields, each labeled 'Title'. The rest of the page follows the same layout as the first screenshot.

The image shows a screenshot of the Smart Library Ask Forum website. At the top left is the library logo and a search bar. Below the search bar is a dropdown menu set to "Show All". The main title "Ask Forum" is centered above a blue content area. Inside the blue area, there is a form for reporting a post. The form includes fields for "Your name" (with a placeholder "MOHAN"), and icons for edit, delete, like, and report. Below the form is a thumbnail image of a book titled "MOHAN E-RESOURCE BOOK". At the bottom of the blue area are navigation arrows ("←" and "→"). Below this is a dark blue footer bar with links for "Home", "About us", and "Services", along with small icons for "Idea Counter", "SLMS", and "Ask Forum". The footer also contains the copyright notice "Copyright © All Right Reserved". To the right of the main content is a dark sidebar with a large white arrow pointing right. The sidebar has two red rectangular sections, each containing a "View Report Details" button, a "Title" field, and a "Description" field.

This screenshot is similar to the one above, showing the Ask Forum section of the Smart Library website. The layout is identical, including the header, search bar, dropdown menu, and footer. The main difference is the content in the blue reporting area. Instead of a post, it displays a thumbnail image of a book titled "MOHAN E-RESOURCE BOOK". Navigation arrows ("←" and "→") are present below the image. The dark sidebar on the right is also present, featuring a large white arrow and two red rectangular sections for reporting messages, each with a "View Report Details" button, a "Title" field, and a "Description" field.

E-Resource section

My Books

The screenshot shows a grid of book covers for 'Maldoloss' by Martin Wickramasinghe. Each entry includes the book title, author, category (Novel), a brief description, and a 'Buy Book' button.

Name : Madolokos
Author : Martin Wickramasinghe
Category : Novel

The image shows a web page with a dark blue header containing navigation links: Home, Ask Forum, Idea Corner, and Log Out. Below the header is a large banner with the text "WELCOME OUR E-News Papers SECTION" and "RESOURCES BOOK". The banner features a collage of various newspaper front pages. Below the banner are six cards, each representing a book. Each card displays a colorful book cover with the title "දෙපොට රුහුණ්ඩ්" (Depota Ruhundu) and the author's name, "Martin Wickramasinghe". The cards provide details about the books, such as "Category : Novel" and "Publisher : Shanthi Books". Each card includes two buttons at the bottom: "Update" and "Delete".

The screenshot shows the 'Add E- News Paper' form on the Smart Library website. The form fields include:
